EDUCATION

B.Tech, Computer Science & Engineering, IIIT Pune

Aug 2023 – May 2027

CGPA: 7.27 / 10.0

Senior Secondary (Science), Sudhakar Naik Jr. College, Akola

2021 – 2023

Maharashtra State Board **78.50%**

EXPERIENCE

Software Development Engineer Intern, Xelron

Mar 2026 – Apr 2026

Bengaluru, Karnataka (Remote)

- **Project Gauss:** Contributed to an HLE-style LLM benchmarking pipeline across 9 academic domains, designing rule-based validation gates and authoring **20+** accepted expert-level question-answer pairs.
- **Project Einstein:** Built multi-stage quality-enforcement tooling for STEM LLM training data, integrating formatting, rubric, and metadata checks against frontier models, contributing **22** accepted question-answer pairs.

Software Developer & iOS Operations Lead, Shreepad Seva Mandal (Nonprofit App)

Apr 2026 – Jul 2026

Pune, Maharashtra (Remote)

- Serving as **Software Developer** and **iOS Operations Lead** within a 3-engineer cross-platform team, owning the release pipeline end-to-end from **TestFlight** beta distribution through **App Store** submission and review.
- Debugged and resolved production issues across **Authentication**, **Push notifications**, and **iOS/Android** platform parity, also contributing fixes directly to the Android codebase to keep behavior consistent across platforms.

PROJECTS

RecoveryOS – Production-Grade Payment Recovery Platform — *Python, FastAPI, SQLite, React, Vite, LLM APIs,*

Razorpay APIs, Pytest, GitHub Actions

[GitHub]

- Architected an AI revenue recovery control plane with **advisory LLM classification**, a **deterministic six-rule policy gate**, **V2 economic optimization**, bounded execution, and verified webhook outcomes.
- Validated the V2 optimizer on a **signal-bearing benchmark**, delivering **INR 100K higher true expected value**, **93.1% Oracle value capture**, and **0% fraud interventions** across robustness seeds.
- Hardened the recovery loop with **HMAC verification**, **durable idempotency**, crash-safe retries, fail-closed validation, and **889+ automated backend tests** enforced through GitHub Actions CI.

Skin Cancer Detection via Deep Transfer Learning — *Python, PyTorch, EfficientNet-B1/B4, DenseNet121, ResNet50,*

FastAPI, React

[GitHub]

- Developed and deployed a full-stack AI-powered web application using a weighted **Ensemble** of EfficientNet-B1/B4, DenseNet121, and ResNet50, achieving **92.3% classification accuracy** on the HAM10000 dataset.
- Engineered a **FastAPI** inference API and **React** frontend for real-time skin lesion classification, reducing inference latency to **1.8 s/image** while supporting **45 req/s** throughput.

AI-Powered Deepfake Detection & Investigation Suite — *Python, PyTorch, XceptionNet, MediaPipe, Grad-CAM++,*

FastAPI, Streamlit

[GitHub]

- Achieved **> 93% accuracy** and **> 0.96 AUC** on FaceForensics++ by fusing XceptionNet, temporal variance analysis, and blink-rate signals into a multi-signal detection system.
- Attained **> 92% manipulation-attribution accuracy** across 4 classes via DSAN with RGB+FFT/SRM frequency streams and contrastive Learning, with Grad-CAM++ explainability surfaced through a Streamlit forensic dashboard.

TECHNICAL SKILLS

Languages

C++, Python, JavaScript, SQL

AI/ML

PyTorch, NumPy, Pandas, LLMs, LLM APIs, Transfer Learning, Computer Vision

Backend

FastAPI, Node.js, Express.js, REST APIs, JWT

Frontend

React.js, Next.js, Streamlit, Tailwind CSS

Databases

PostgreSQL, MongoDB, Redis

Testing & DevOps

Pytest, Catch2, CMake, Docker, Git, Linux, CI/CD, ASan/UBSan

Core CS

DSA, OOP, DBMS, Operating Systems, Computer Networks, SOLID Principles

Competitive Programming

LeetCode (1473) · CodeChef (1402) · 270+ Problems · 20+ Contests

ACHIEVEMENTS

- **Cyber Cypher 5.0 Finalist** (Team Lead) – Built **ArcticOps**, a multitenant cold-chain logistics system (Next.js, Node.js, Express), NMIMS MPSTME [Certificate]

Mar 2026
